

Features Completed:

None

What Worked During Demo:

Swift Prototype

Early Database Model

Issues Faced During Development:

Loss of group member

changes in assignment scheduling

adjusting to using wireframe

Issues Faced During Demo:

no working features

Suggestions from TA:

He wants to see a login that actually pulls from the database

Another core feature that includes interaction ui and our database

This taught us we need to communicate much better to accomplish what we need to with the time given.
